DSE**WebNet**®

Industry-Leading Remote Control & Monitoring Software

SUPPORTS COMMUNICATION ACROSS MULTIPLE DEVICES

ADVANCED REMOTE MONITORING OF GENSETS, PUMPS & COMPRESSORS.

Welcome to DSE**WebNet®** - the industry-leading online management tool for remote control and monitoring of generators, pumps and compressors.

Allows 24/7 access to multiple applications from anywhere in the world, and offers a range of outstanding features suitable for multiple applications. Available in desktop and mobile versions, DSE**WebNet®** is both powerful and versatile.

*"Our maintenance engineers were regularly required to go to site to fix issues with our generator fleet. Very often they arrived to find that the E Stop had been pressed or they did not have the right part to fix the problem. Now, with DSE**WebNet®** in place, we can see the live system status allowing us to diagnose problems in advance, saving us a considerable amount of time and money".*

*"Many of our generators are in unsupervised sites and were continually running out of fuel. Since we installed DSE**WebNet®** we automatically receive emails when the fuel level is low, so timely refuelling can be arranged".*

*"As a rental company one of the key benefits of DSE**WebNet®** to us is the remote engine reporting. This allows us to effectively manage the contracted running hours of our entire rental fleet".*

User Configurable Access
Allocate different user privileges, giving admin users the ability to provide full control or read only access, to prevent accidental system changes.

Single User or Organisational Accounts
Operate as a single user with full control or create an organisational account allowing access to multiple users with flexible permissions.

Configurable Reporting
Choose the reports you want to see and send automatically by email or SMS to a maximum of 25 users.

Configurable User Interfaces
Create bespoke user interfaces using configurable widgets and templates to allow quick and easy access to key equipment and site data.

Customisable Branding
Organisational accounts allow custom branded backgrounds and logos to be used, producing screens with a bespoke corporate identity.

App for Mobile & Tablet
Available for iOS and Android devices. The App can be linked to sites pre-configured using a desktop connection.

Geo-Fencing & Asset Tracking
Protect against theft or movement by creating a virtual geographic boundary around your equipment using GPS.

Maintenance Scheduling & Logging
Plan and customise essential maintenance schedules and keep logs of previous maintenance work for all users to view.

Event Triggers
Set up event triggers to email or message users when specific conditions occur, including active alarms, low fuel levels and genset status.

Works across any phone network
Compatible with SIM cards from any network provider, allowing our DSE**890** and DSE**891** to be used globally.

KEY INDUSTRIES

WORKS ACROSS MULTIPLE PLATFORMS

Wherever you are, wherever your application, DSE**WebNet®** keeps you in control.

A gateway device is required to use DSE**WebNet®**.
There are two different variants available.

DSE**890**
DSEWebNet® Gateway
3G (GSM)/Ethernet

DSE**891**
DSEWebNet® Gateway
Ethernet Only

Efficient Fleet Management.
